Set

The scenery will be sent in one truck, we need a good parking space and the necessary parking permit to park the truck through our stay.

The positions of all the masking will be included in the light plot.

The scenery might be built over the orchestra pit and under the fire curtain. Please check the local fire / safety regulations and advise us on any coming problems.

Some seats might have to be blocked for sight line issues.

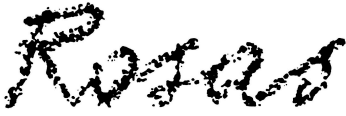

We might decide on the spot the need for a black box, please have the necessary drops and legs available.

Rosas provides:

- Black dance floor: 1.60m wide on a 12m x 12m area
- 1 frame with black fireproofed plastic 10m wide x 4.5m high which will be suspended on a fly bar
- A dozen of chairs
- The necessary tubes for sidebar and vertical bar rigging

Theatre provides:

- Minimal stage depth: 12 mtr.
- Minimal grid height: 6 mtr.
- Minimal stage width: 12 mtr.
- Minimal portal width: 12 mtr.
- Minimal portal height: 6 mtr.
- Necessary grid or fly bars to hang both set and lights according to the specifications on the plan
- Black dance vinyl to cover parts of the side stage area
- The option for a black box will stay open until we see the stage. The theatre will provide the necessary amount of black side drops standby to cover the complete side from down stage to upstage and the back. The amount will be decided on the spot.

LIGHT

Rosas provides:

- 1 HQI 1000W lighting fixture, to be connected to a non-dim circuit
- 20 x Par 36 on 5 & 3 bar units
- 2 x HPL 1000 W, to be connected to a non-dim circuit
- Sets of mirror frames for both sides of the stage
- Tubes for side bars & vertical bars
- Lighting board on dmx512
- 2 x tripods maximum 2m height

Theatre provides:

- 18 x 2kW PC with barn doors all with frost Rosco 119
- 10 x 1kW PC with barn doors all with frost Rosco 132
- 12 x 2kW Fresnel with barn doors type ADB or Strand
- 22 x 1kW profile of at least 41°
- 8 x 2kW profile for front of house all with Lee 201
- Necessary safety cables to secure clean & safe hook-up
- The necessary dimmers: Minimum 72 x 3Kw dimmers
- A clean DMX-512 connection and DMX cable:
 - From Rosas lighting board to theatre house dimmers.

All our equipment uses **220V / 50Hz** and is wired with European continental SHUCKO 16A plugs or CEE blue 16A plugs except when explicitly stated.

For any other kind of power or wiring with local plug, the theatre must provide the necessary amount of converters from the local standard to either SHUCKO or CEE 16A.

VIDEO

Rosas provides:

- TBC

Theatre provides:

- TBC

SOUND

The sound mixing area width will be positioned in the central axe of the auditorium and should not be placed under a balcony. The sound booth requires around 2 meters width. A table has to be provided by the theatre for the mixing console and the peripherals.

ROSAS PROVIDES

- audio computer
- USB-out
- (Sound Card Jack or XLR out)

THEATRE PROVIDES

Control

- A good quality digital mixing desk

PA System

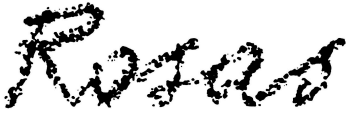

- A good quality FOH system with full coverage of the venue

Monitors

- 4 monitors in the stage corners

Communication

- Full duplex intercom with at least 4 wireless headsets (light, stagemanager, dresser, house stage manager)
